Leadership School Brochure

*...Building Strategic Leadership for Sustainable
Development in Africa.*

The importance of leadership for the success of organizations and nations cannot be overemphasized. Some scholars have pointed out that everything rises and falls on leadership. Despite this recognition, there is scarcity of leaders all over the world. According to Myles Munroe, it is possible to train leaders. It has been proven that leaders can be trained to become top strategists who will be able to envision the future and help to map out strategies on how to get there. Additionally, leaders can be trained to manage for success through people, policies, programmes and principles.

The African Centre for Leadership, Strategy & Development (Centre LSD) Leadership School is set up to train leaders by attempting to unravel the complexity of leadership and offering a framework that will help people to become great leaders. The school focuses on both leader development (expanding the capacity of individuals for effective leadership roles and processes) and leadership development (expansion of organizations capacity to enact basic leadership tasks including setting direction, creating alignment and maintaining commitment).

At the end, we produce leaders who will know how to mobilize others to get extraordinary things done in organizations and nations. They know how to transform values into actions; visions into realities; obstacles into innovations; separateness into solidarity and risks into rewards.

The School is designed for people who want to become leaders and be equipped with leadership skill for transformation of organizations and society. It provides students with tools and ways to have vision for leadership and become better leaders.

The school runs for a period of one year. The inaugural class will run from June, 2017- May, 2018. The second class will run from June, 2018 -, May 2019 and subsequently from June - May every year. At the school, there are lots of presentations, group work, interactive sessions, coaching, mentoring and assignments to be supervised by the Faculty but physical meeting takes place every second Saturday of the month from 10:00am-3:00pm at Hall 3, PTI Conference Centre, Effurun-Warri, Delta State. A maximum of fifty students will be admitted for any session. Participation in school is free but students are expected to buy textbooks on leadership (not supplied by the Foundation). Certificate of participation will be given to students who complete the necessary attendance (at least 70 per) and assignments.
